

SEAN ARGIE A. QUITELES

Axis Residences, Pioneer St. | Mandaluyong City, Metro Manila, PH 1550 | 09218847645 | seanargieq@gmail.com

PROFESSIONAL SUMMARY

Programmer/Analyst with hands-on experience in Java Spring Boot, Thymeleaf, and React, currently advancing through Vertere Global Solutions' Hire-Train-Deploy (HTD) Program. Skilled in building RESTful APIs using DTO design patterns and validating code quality with JUnit and Mockito. Previously delivered secure authentication features for a MERN-stack application as a Software Developer Intern at Bridge360, achieving 100% integration success. Computer Engineering graduate from Mapúa University committed to continuously growing expertise in full-stack architecture and software testing.

EXPERIENCE

HTD Programmer/Analyst

June 2026 – Present

Vertere Global Solutions Inc. | Makati City

- Selected for Vertere's Hire, Train, Deploy (HTD) Program, an intensive training pipeline that equips early-career professionals with in-demand technical skills for project-ready roles.
- Developing server-side applications using Java, Spring Boot, and Thymeleaf, building RESTful APIs with DTO design patterns, and creating front-end interfaces using React and JSX.
- Practicing unit testing with JUnit and Mockito while continuously growing knowledge of software engineering methodologies, including SDLC and STLC, through ongoing hands-on training.

Software Developer Intern

May 2025 – July 2025

Bridge360, Inc. | Makati City

- Engineered responsive UI components and RESTful backend features for a MERN stack application, achieving 100% successful integration of email verification and password reset systems to enhance user security.
- Optimized software reliability by conducting rigorous unit testing and debugging, resulting in the delivery of defect-free code and a streamlined deployment lifecycle within an Agile environment.
- Facilitated project transparency and technical alignment by producing comprehensive documentation and presenting updates in weekly sprints, reducing troubleshooting time for production defects.

EDUCATION

Bachelor of Science in Computer Engineering

Aug 2018 – Jan 2026

Specialization in UNIX Administration — Mapúa University | Manila, PH

CERTIFICATIONS

Associate Data Engineer

Aug 2026

DataCamp

TECHNICAL SKILLS

- Programming: Java, Python, JavaScript, TypeScript
- Frameworks: Spring Boot, Thymeleaf, React (JSX), Node.js, Express.js
- API Design: REST APIs, DTO (Data Transfer Object) patterns
- Testing: JUnit, Mockito, Unit Testing
- Database: MongoDB
- Systems & Tools: Linux, Git, GitHub, Postman, OpenCV, Visual Studio Code
- Data-Related Skills: Basic data handling, API integration, data validation, structured data processing
- Methodologies: SDLC, STLC
- Other Tools: Microsoft Office (Word, Excel, PowerPoint)

ACCOMPLISHMENTS & INTERNATIONAL EXPOSURE

International Technology Site Visits – Japan

Nov 6–10, 2024

Nagoya, Osaka, and Kyoto, Japan

- Analyzed real-world applications of automation and sensing technologies during site visits to Toyota Technological Institute and Omron Corporation.
- Observed high-precision manufacturing systems and industrial innovations, gaining a practical understanding of large-scale data-driven hardware and software integration.
- Engaged in cross-cultural technological seminars focused on the evolution of robotics and smart manufacturing within the Japanese tech ecosystem.
