

SEAN ARGIE A. QUITELES

Axis Residences, Pioneer St. | Mandaluyong City, Metro Manila, PH 1550 | 09218847645 |
seanargieq@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering graduate from Mapúa University with foundational expertise in the Software Development Lifecycle (SDLC) and UNIX Administration. Knowledgeable in developing scalable applications using the MERN stack and implementing secure RESTful API authentication systems. Proven ability to thrive in Agile environments, with a strong focus on unit testing, code reviews, and technical documentation to ensure continuous integration and high-quality software delivery.

EXPERIENCE

Software Developer Intern

Bridge360, Inc. | Makati City

May 2025 – July 2025

- Collaborated with a multinational facing development team to build a MERN stack application, contributing to the development lifecycle from requirement analysis to pre deployment testing and quality assurance.
- Enhanced account security and reliability by investigating logic requirements to implement RESTful email verification and password reset systems, delivering deployment ready code to reduce unauthorized access risks.
- Developed responsive user interface components using React.js and performed rigorous unit testing to ensure the delivery of maintainable and defect free code.
- Utilized Git and GitHub for source version control, participating in rigorous code reviews to maintain coding standards and ensure seamless integration within an Agile team environment.
- Streamlined project transparency by preparing technical documentation and presenting updates during weekly sprint reviews, assisting in the rapid troubleshooting and resolution of production defects.

EDUCATION

Bachelor of Science in Computer Engineering

Specialization in UNIX Administration

Mapúa University | Manila, PH

Aug 2018 – Jan 2026

TECHNICAL SKILLS

- Programming: Python, JavaScript, TypeScript
- Web Development: React.js, Node.js, Express.js, HTML5, CSS3
- Database: MongoDB
- Systems and Tools: Linux, OpenCV, Git, GitHub, Visual Studio Code, Microsoft Office (Word, Excel, PowerPoint), Postman
- Language: Filipino, English

ACCOMPLISHMENTS & INTERNATIONAL EXPOSURE

International Technology Site Visits – Japan

Nagoya, Osaka, and Kyoto, Japan

Nov 6-10, 2024

- Participated in international technology site visits under the Computer Engineering Seminars and Field Trips program.
- Visited Toyota Technological Institute, Toyota Kaikan, Brother Industries Museum, and Omron Corporation Museum.
- Observed innovations in automation, sensing technologies, and manufacturing systems.

CERTIFICATIONS

- Applied Plotting, Charting and Data Representation in Python — Coursera
- Supervised Machine Learning: Regression and Classification — Coursera
- Introduction to Data Science in Python — Coursera
